AMERICA'S NAVY
A GLOBAL FORCE FOR GOOD™

Idea Power.™

Our long-term thinking is paying dividends to all our stakeholders. Even though we've provided electricity to the Southeast for more than 100 years, we're not living in the past when it comes to energy. We're fueling our future with new minds, new ideas and new technologies that will keep us at the forefront of the energy industry. We're investing in nuclear power, 21st century coal, natural gas, renewables and solutions for increased energy efficiency. We've consistently delivered for our customers, our communities and our other stakeholders.
